

Imagined Cities: Urbanism as a Project

Course instructor: Joshua Comaroff

Learning Objectives

- Identify and explain key concepts in urban projects proposed at different historical stages
- Compare and evaluate practical and ideological imperatives within urban planning and design
- Cultivate advanced and extensive knowledge of urban design ideas and systems
- Accurate summary and critical assessment of key concepts in urban planning and design as expressed in biweekly assignments
- Development and delivery of a written project proposal that describes the design of an urban research project that demonstrates appropriate selection of research subject
- Development and delivery of a final paper on a self-selected topic (with instructor's approval) relevant to course subject
- Participation in class discussion of subject matter, through question and commentary
